

First draw your guidelines. The example is in color so you can see the difference, but you should draw yours lightly with regular pencil. You will erase these lines at the end.

6

Instructions: Label your lines: 1-2-3 across the top (left to right), 1-2-3-4-5 (top to bottom)

When given two numbers, the first number is for the numbers along the top (a column), the second number is for the number down the side (a row). Put your finger on each number and slide them towards each other. Where they meet, you have the correct spot.

You are going to follow the directions below to figure out where the different face features go. Don't make these perfect—we'll edit in the next step.

1. Draw the left eye where column 1 & row 3 meet
2. Draw the right eye where column 3 and row 3 meet
3. Draw the nose in the middle of column 2, making it go all the way from rows 3&4
4. Draw the mouth along row 5, making the left side touch column 1 and the right side touch column 3
5. Draw the ears on either side, making the top touch row 3 and the bottom touch row 4
6. Your hair should start at column 2, row 1
7. your neck should continue along column 1 and 3.

7

1. Carefully erase your guidelines so you are left with just your face. All the different parts of your face are now drawn in the correct spot.
2. Now, think about how to put in details that make your face look more like you. For example:
 - Change the face of the shape so it looks like yours; do you have a round face? A pointed face.
 - Think about how your eyebrows look; are they straight or curved?
 - Do you have a pointy nose or a round nose?
 - Think lips or thick lips?
 - Do you smile a lot, or are you more serious?
 - Do you have straight hair or curly hair?
